

Ghazaleh Razi

Frontend Engineer

- ghazale.razi@gmail.com
- +989355595775
- linkedin.com/in/ghazaleh-razi

Education

B.Sc. in Computer Engineering,
Islamic Azad University
10/2020 – 07/2025

Languages

English
Professional working proficiency
fluent in reading, writing, and speaking

Certificates

- Introduction to Front-End Development
Meta
- Programming with JavaScript
Meta

Summary

Frontend developer with hands-on experience building enterprise web applications using Angular, TypeScript, and RxJS. Focused on scalable UI architecture, reusable component systems, workflow-driven applications, and API integrations. Experienced in Nx monorepos, state management, and modular frontend development within Agile teams. Focused on maintainable enterprise systems, reusable UI architecture, and workflow-oriented frontend engineering.

Core Strengths

- Enterprise Angular Application
- Component Architecture
- Workflow-driven System
- Nx Monorepo Development
- REST API Integration
- Role-based Business Flows
- Shared UI Libraries
- State Management with NgRx

Professional Experience

Frontend Developer, Dadepardazy Farzanegan Saei
06/2025 – Present

Domains / Industries:
GovTech and workflow-driven public-sector platforms, including operational dashboards, document management flows, and organization-specific enterprise solutions.

- Designed and delivered enterprise-scale Angular solutions for document-driven workflows, bidding flows, applicant operations, and role-based business actions.
- Built reusable frontend modules and shared UI foundations within an Nx monorepo to support scalable multi-domain applications.
- Implemented robust async flows, validation strategies, guarded actions, and state-aware UI behaviors for business-critical scenarios.
- Reduced duplicated UI logic by introducing reusable Angular patterns and shared components across multiple business modules.
- Collaborated with backend teams to integrate REST APIs and real-time operational updates using SignalR.
- Contributed to implementation consistency through reusable UI patterns, shared components, and standardized frontend practices.

Frontend Developer, Behpardaz Jahan

10/2024 – 06/2025

Domains / Industries:

Custom enterprise platforms and workflow-driven operational systems.

- Built responsive Angular UIs for enterprise workflows while maintaining consistency across shared UI patterns and reusable components.
- Developed reusable frontend components and implementation standards to improve delivery speed and reduce UI/behavior inconsistencies.
- Integrated REST APIs with backend services, handling validation, loading/error states, and complex data-binding scenarios.
- Improved application reliability and user experience by resolving edge cases, optimizing frontend flows, and refining business interactions.
- Participated in Agile development cycles including planning, implementation, reviews, and iterative feature delivery.

Skills

Frontend

Angular, TypeScript, JavaScript, HTML5, SCSS, RxJS

State Management

NgRx, ComponentStore, RxJS Operators

UI & Styling

PrimeNG, PrimeFlex, BootStrap, Angular Material, Responsive Design, PostCSS

Architecture & Tooling

Nx Monorepo, Feature-based Architecture, Component Architecture, Shared UI Libraries, Angular CLI, ng-packagr, Git, npm Scripts, ESLint, Prettier

Testing & Quality

Jest, Jasmine, Unit Testing, Reusable Component Design, Validation Strategies

Integration

REST APIs, JWT Authentication, SignalR Client, Chart.js

Workflow & Engineering Practices

Agile/Scrum, Modular Architecture, Workflow-driven Systems, Role-based Workflows, Code Reviews
